

Solar Inspection and Maintenance

OVERVIEW

This nationally accredited course covers knowledge of the components and different system configurations for grid-connected PV systems and battery storage systems with grid-connected photovoltaic systems.

The course provides practical skills in installation, commissioning, maintenance and fault finding on renewable energy systems.

This course encompasses the provision of known solutions to predictable problems in photovoltaic energy apparatus operating at extra low voltage and low voltage.

REQUIREMENTS

Current WA Unrestricted Electrician's Licence or equivalent issued in an Australian State or Territory.

CONTENT

Core units of competency:

- UEENEEK125A Solve basic problems in photovoltaic energy apparatus and systems
- UEENEEK148A Install, configure and commission LV grid connected photovoltaic power systems
- UEERE4001 Install, maintain and fault find battery storage systems for grid connected photovoltaic systems

DURATION

3 days full time.

PRICE

Course fee \$750
