

Safe electrical isolation

OVERVIEW

This industry developed non-accredited course is for people with little or no electrical background that work in roof spaces. This course will enable participants to become competent in safely isolating the electrical supply in accordance with current Western Australian Legislation.

Since May 2018, any person working in a domestic roof space must isolate the electricity before entering and commencing work. This course delivers the required knowledge and skills necessary for isolating the electrical supply, applying lockout and tagging procedures and equipment, and safely reinstating the electrical supply on completion of the work.

CONTENT

Basic electrical system design, isolation techniques, verification of isolation and reinstatement of electrical supply.

DURATION

4 hours.

PRICE

Course fee	\$190
Subsidised fee	\$66
